DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35
 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 2. Claims 1-2, 4, 6-11, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Godsill (IEEE Publication).
- 3. Regarding claim 1, Godsill discloses a method and system for extracting an audio signal from a noisy environment, comprising the step of: utilizing a non-Gaussian model to extract the audio signal from the noisy environment (*referring to sections 2-2.2 on pages 3797-3798*).
- 4. Regarding claims 2, 4, 11, and 13, Godsill further discloses a method in accordance with claim 1, further including the step of dynamically updating said non-Gaussian model during processing of the audio signal (section 3 on page 3798), and further including the step of updating the probability that the audio signal is present in the noisy environment (section 3 on page 3798).

Application/Control Number: 09/990,317

Art Unit: 2655

5. Regarding claims 6-7, Godsill further discloses a method in accordance with claim 1, wherein the audio signal is speech, and wherein the audio signal is music (sections 4 on page 3799).

6. Regarding claims 8-9, Godsill further discloses a method in accordance with claim 1, wherein said non-Gaussian model is provided with a plurality of components (*parameters shown in the second column on page 3798*), and wherein said non-Gaussian model is provided with five components (*parameters V, theta, phi, u, and y shown in the second column on page 3798*).

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 3, 5, 12, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Godsill (IEEE Publication) in view of Krasny et al. (US Patent No. 6349278).
- 9. Regarding claims 3 and 12, Godsill fails to specifically disclose a method and system in accordance with claims 2 and 10, further including the step of updating the power spectral density of the audio signal during processing of the

Application/Control Number: 09/990,317

Art Unit: 2655

audio signal. However, Krasny et al. teach the step of updating the power spectral density of the audio signal during processing of the audio signal (col. 5, In. 1 to col. 6, In. 44).

Since Godsill and Krasny et al. are analogous art because they are from the same field of endeavors, it would have been obvious to one of ordinary skill in the art at the time of invention to modify Godsill by incorporating the teaching of Krasny et al. in order to determine filter coefficients to remove noise.

10. Regarding claims 5 and 14, Godsill further discloses a method and system in accordance with claims 3 and 12, further including the step of updating the probability that the audio signal is present in the noisy environment (section 3 on page 3798).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Huyen Vo whose telephone number is 703-305-8665. The examiner can normally be reached on M-F, 9-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doris To can be reached on 703-305-4827. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
